

What energy resources does Chad have?

The majority of its existing capacity comes from diesel, natural gas and heavy fuel oil generation. Chad is living an energy crisis that undermines its development possibilities with extremely limited electricity access (8%).

The country is however rich of energy resources, including fossil fuels with strongest solar and wind energy potential.

Does Chad framework allow private investment in energy production?

Chad framework has allowed private investment in energy production since only in recent years and as of 2018 currently only one solar IPP (Djermaya - 28MW) is active and expected to reduce power supply failures and global price fluctuation.

This project is also part of the Desert Top Power Initiative.

How many independent power producers in Chad?

There is One (1) active Independent Power Producers (IPPs) in Chad.

Law No.036/PR/2019 relating to the national electricity law.

Please read the law here

Is Chad a landlocked country?

Chad is a large landlocked country, with vast desert areas.

Approximately 70% of the population lives in rural areas and half of the overall population lives below the international poverty line of \$1.25/day.

Chad is endowed with the tenth-largest oil reserves in Africa, as well as solar and wind resource potential.
