

Station de base nationale 5G de China Communications

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom.

In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

Does China have a 5G network?

Wen Ku, director-general of the China Communications Standards Association, highlighted the nation's progress in telecommunications, stating, "China has made remarkable strides in 5G infrastructure, which gives it an unparalleled edge in exploring 6G technologies."

How many 5G phone subscriptions are there in China?

China's 5G mobile phone subscriptions surpassed 1 billion by the end of November, local press reported, citing data released by the Ministry of Industry and Information Technology.

The 5G subscriptions now represent 56% of all mobile lines in China, reflecting a 9.4 percentage point increase compared to the previous year.

Will 5G reach 85 percent by 2027?

Efforts will also be made to foster collaboration among telecom providers, application developers, and the companies across the industrial chain to build a robust 5G ecosystem.

In line with these efforts, an action plan issued last month sets a target to achieve a 5G user penetration rate of more than 85 percent by the end of 2027.

Le nombre de stations de base 5G en Chine a bondi à 2,73 millions à la fin du mois d'avril, dans le cadre des efforts du pays pour construire l'infrastructure la plus grande et...

The number of 5G base stations in China now exceeds 4.1 million, data from the Ministry of Industry and Information Technology...

Le nombre de stations de base 5G en Chine s'est élevé à près de 3,92 millions fin juin, selon les données publiées mardi par le ministère de l'Industrie et des Technologies de...

Lhasa (Xinhua) -- Dans l'après-midi du 30 avril, heure locale, China Mobile a mis en service une station de base 5G au camp avancé à une altitude de 6 500 mètres sur le mont...
